MOANA WAS THE BIGGEST CONTRACT

The Victoria Daily Times of January

In the undertaking just completed on the R. M. S. S. Moana in Esquimalt, Victoria mechanics have turned out the biggest contract of the kind ever handled in this port. Indeed, it is stated by those who know that no similar job of importance has ever been attempted on the Pacific Coast. The contract was carried out by the British Columbia Marine Railway Co., and considering the difficulties encountered was executed in remarkably short time. The Moana was floated free of the cofferdam at 11 o'clock yesterday morning, and after calling at the outer wharf at once proceeded to Vancouver to load for her outward

The damage to the ship, received last month off William Head, was very extensive, and, as will be remembered, the dry dock could not be secured at HEAVY the dry dock could not be secured at ing priority in the matter of its use. A cofferdam was therefore planned and built by the company. This work occupied just eight days. Men were engaged night and day in the building of it, the dimensions of the structure being 35 by 24 feet. Sixty thousand feet of lumber was used in its construction. The cofferdam was strongly bolted, riveted and caulked, and seven tons of iron was used in the fastenings. The chief damage to the Moana was

a broken stern post and rudder post badly bent and twisted. This necessitated a new steel forging, weighing and riveted into place, the scarps being perfect. The rudder was unshipper, stripped, straightened and replaced with new pintles. The gudgeons off the rudder post were rebored and bushed with lignum vitae.

In addition to the above, the steering gear, consisting of tiller, quadrant and rack, was entirely disabled. A new tiller, weighing about two and a half tons, had to be forged, machined and shrunk on the rudder stock. Minor work in connection with all of the above, details of which would be too long to give, had to be undertaken. All of these repairs were completed most expeditionsly, especially in view

A splendid job has been turned out, which reflects great credit on British Columbia resources. The work has given the utmost satisfaction to all interested, and Mr. Bullen has received númerous congratulations and deservedly so. Owing to the enterprise of the Messrs. Bullen in the designing and construction of a cofferdam the repairs were carried out here instead of in an American dock, and the large amount of money locally expended will no doubt be appreciated by the public.

ARRIVED AT HONOLULU.

ENGINEERS HAVE A GOOD MEETING

At the meeting of the Honolulu Engineering Association, in Castle & Cooke's hall last night, the paper by A. C. Alexander on "Ether Waves" took up so much time that E. Koepke's promised paper on "The Fuel Question in Sugar Boiling" was not reached. Mr. Alexander's paper was a learned production and evoked questions from number of members.

Next morth's meeting will be the semi-annual one, when officers for the latter half of the year will be elected. A committee was appointed to make arrangements for the meeting, which consists of Edward C. Brown, F. W. Beardslee, T. H. Petrie, C. C. Perkins and Henry Ginaca. As after the annual meeting a banquet is held, so after the semi-annual one a smoker will be in order. There will be music and refreshments.

VICTORIA STEAMERS NOW CRUISERS

The Victoria Daily Times says:

Captain Ona or the Nippon Yusen Kaisha liner Kaga Maru, who had charge of the line since she was placed on the British Columbia and Puget Sound run, received notice at Yokohama that his services were immediately required, and to relieve him of his duties on the trans-Pacific liner, Captain Parsons was summoned to take command of the steamer. Capt. Ona belongs to the Japanese naval reserve, and in the event of war will be given charge of some of the Japanese transports. The government is now holding a number of these vessels in readiness for service in event of trouble, and has reduced the line which runs to Victoria by three, these being the Riojun Maru, Tosa Maru and Aki Maru. According to officers of the Kaga these steamers are not likely to be seen in these waters again for some time. In addition the government has taken over all the Nippon Yusen Kaisha liners on the Australian route and a number of those running to Europe.

There was another tremendous downpour of rain last evening, beginning a little before eight o'clock which turned the streets into rivers. Pilkoi became a young Mississippi in ten minutes and discharged its customary flood across Beretania street. Fortunately the storm was not of long duration and not Fostor, P much damage was done save to the Chinese New Year decorations. How far the storm extended into the country could not be learned. The outlook is still unsettled.

Kausi's Sheriff Is Praised.

"Sheriff Coney of Kauai is entitled to all the credit in the capture of the murderer of Glennan, and for wringing a confession from him," said Chester Doyle yesterday. Doyle has just returned from Kauai where he was sent to act as interpreter in the case.

"Sheriff Coney worked up the whole case against the Japanese murderer, arrested everybody supposedly having any connection with the matter, sent of the unavoidable delays in connection | Deputy Sheriff Rice here to get the man, and employed methods which got a confession from him. In some respects he performed his work as the late Marshal E. G. Hitchcock used to."

A Honolulu man was riding along a road on Hawaii lately, when a native driving in a brake ahead was pointed out to him as the author of a bull that would do credit to "Ould Erin." The native was a teacher and the story is that he wrote to the Board of Education for a raise in salary. He said in the letter that he had worked faithfully, his family had increased and the position was not an easy one. "I don't think," the teacher concluded, "that you can find anyone who would be willing to ride three or four miles on a little jackass like me."
